

 INFINITY **ZWORKSPACE**

 **ZUCCHETTI**

**WORK SPACE
MANAGEMENT
NO LONGER HAS
LIMITS**

MANAGEMENT AND BOOKING SYSTEM OF CORPORATE ASSETS

INFINITY ZWORKSPACE,
THE ZUCCHETTI SOLUTION
THAT SUPPORTS COMPANIES
IN ORGANIZING WORKSPACES
BY SIMPLIFYING
THEIR BOOKING, ASSIGNMENT
AND MONITORING PROCESSES.

A new way of managing company spaces and assets, responding to the need to apply more dynamic and flexible organizational and technological models aimed at optimizing the management of people and work environments. ZWorkspace is a **complete system** for anyone who needs to manage and use space: Facility Manager, Logistics Department, HSM, HR Manager, employees.

WHY USE ZWORKSPACE

- **FLEXIBLE:** ZWorkspace is easy to use, has an intuitive graphical user interface and a flexible structure, with menus, views and printouts differentiated by user.

- **WEB and MOBILE:** the solution is completely web based, but is also available on mobile devices, with apps for bookings and check-in/check out.

- **SMART WORKING:** the solution is ideal for companies that operate in co-working and for companies that manage personnel and spaces with a smart working approach.

- **PRODUCTIVITY:** employees, being able to manage the booking of assets independently, feel more involved in company life. The solution guarantees workers an environment which is more functional for the activities to be carried out, more flexible and dynamic, as well as more collaborative and productive.

- **SAFETY:** ZWorkspace helps you ensure people are working safely and at their ease. In fact, it lets you stagger presence in company spaces at set times and to make bookings based on the actual capacity of each area. In this way, overcrowding is excluded and the right distance between workers is guaranteed, ensuring that the activity is carried out in utmost comfort.

WHAT YOU CAN DO

ASSET DEFINITION AND ASSESSMENT

if you are a facility manager, or in any case an asset manager, you **can define, census and define the costs** of the different types of assets and work spaces (workstations, desks, car parks, meeting rooms, training rooms, seats in canteens and on shuttles, company bar services, toilets) in the company, combining them with specific groups of users authorized to book them and assigning them according to activity type.

BOOKING MANAGEMENT

at any time and wherever you are, also thanks to **the mobile app**, you can **manage bookings** of rooms, desks and other assets, either as a supervisor user or in self-service mode, if you are an employee. It is also possible to book the related services and supporting equipment (catering, projectors, whiteboards, sundry materials). Bookings can be viewed and managed with check-in and check-out functions, via calendar, QR Code and NFC Tags, or via BLE antennas located in the workstations.

MONITORING

specific **monitors** positioned in the company spaces let employees check whether a room or a workstation is free or occupied, also providing a valid support in providing directions and guiding people inside the building.

ANALYSIS

the software has reports and indicators to monitor performance and let management initiate faster decision-making processes and make **precise strategic analyses**, in order to keep company costs under control and optimally manage real estate investments.

- **COST REDUCTION:** if you are a Facility Manager, ZWorkspace helps you to better organize, manage and classify workspaces and assets, letting you optimally manage their intended use and reduce the associated costs, through the design of work settings diversified by building, floor and specific company area.

ZWORKSPACE HAS SPECIFIC AND MODULAR FUNCTIONS FOR THE MANAGEMENT OF COMPANY SPACES AND ASSETS AND, INTEGRATED WITH THE OTHER ZUCCHETTI INFINITY SOLUTIONS, SUPPORTS THE COMPANY IN THE PROCESSES OF PERSONNEL ORGANIZATION AND ASSET AND FACILITY MANAGEMENT.

INTEGRATIONS

Infinity ZWorkspace
is integrated with:

- **Zucchetti's Personnel Management solutions**, so that only authorized people can enter based on the bookings made and in order to know how many people are inside a work space (integrated with Access Control and Attendance solutions), but also to manage the people present in a given space in the case of an emergency (integrated with Safety solutions). Moreover, thanks to the unique database, all events concerning an individual collaborator (absences, transfers, courses, etc.) contribute to automatically updating the status of each reservation.

- **Zucchetti Asset Management solutions**: the facility manager has at his disposal a complete suite for management of the building and its spaces, in terms of booking the spaces themselves, air quality control and energy and maintenance management of the related systems, machinery and equipment. Assets are made more reliable and efficient and environments are more sustainable, guaranteeing the comfort and health of all the people who work in them.

INFINITY ZUCCHETTI

A UNIQUE INTEGRATED PLATFORM FOR ASSET MANAGEMENT

With Infinity Zucchetti you can solve problems related to platforms that “do not talk to each other” and that therefore create complexities, instead of easing your business and making it more efficient. You can overcome the technical limits of traditional systems, often mutually incompatible, and become able to design, build and manage all processes that integrate your company’s energy, environmental, technical and maintenance aspects in a unique application solution.

**SOFTWARE | APP MOBILE | ANALYTICS |
ARTIFICIAL INTELLIGENCE | IOT | HARDWARE**

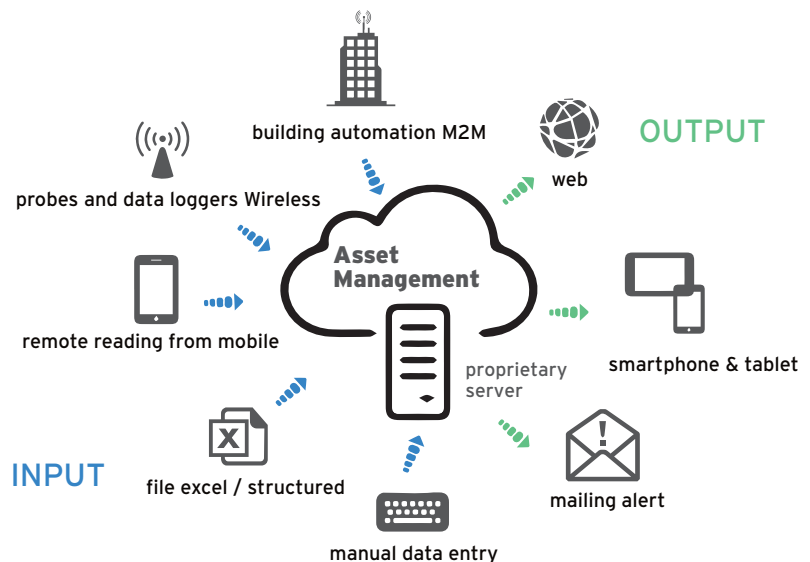

ONE COMPLETE APPLICATION AREA

Unique database, unique portal for sharing and collaborating, DMS, analytics and workflow tools to support the activities of all corporate managers.

ASSET MANAGEMENT

- Energy Management
- Measurement of environmental parameters
- Technical and maintenance management

INFINITY SOLUTIONS DON'T END HERE!
